The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. It is shown that the structure of the atom is determined by the laws of quantum mechanics, which are based on the principles of wave mechanics. The second part of the paper is devoted to a discussion of the experimental results obtained in the study of the structure of the atom. It is shown that the experimental results are in good agreement with the theoretical predictions.

1. The first part of the paper is devoted to a general
 discussion of the problem. It is shown that the
 problem is of great importance and that it has
 not been completely solved. The author then
 proceeds to a detailed analysis of the problem.
 2. In the second part, the author discusses the
 various methods that have been used to solve the
 problem. He shows that each method has its own
 advantages and disadvantages. He then compares
 the different methods and shows that one method
 is superior to the others.

3. In the third part, the author discusses the
 results of his own research. He shows that his
 method is superior to the others. He then
 discusses the various applications of his method.
 4. In the fourth part, the author discusses the
 conclusions of his research. He shows that his
 method is the best method for solving the
 problem. He then discusses the various
 applications of his method.
